miles was firly described as "an idle empire" Scuttements were mattered over it; but they ABUSE OF MIENT LAWS. were few and far between, and almost whelly without mans of ir she with the outside Farmers conventions in all parts of Liceous try are protesting against abuses purportated and continued through the patent lams. The stree-well and the harbed sence-wire come in markets. On the Will pa river, near Shoal water bay, and along # e shores of that bay for the major part of these objurgations. But and on the Chebalis river still further north bloss: we are merely typical of a system. It there were considerable settlements, but they as it to saying that there is no swil so bad as we're comparatively por because there was no a per orted good; and yet perhaps it is imin the interest of the bave made wonderful a spress. A few men, apsource to traine a law in the interest of the source of the country, in 11 a such a that some shrewd "operator" will not preciating she resource of the country, in 11 a trime is coach and six through, in one way or fall pf 1881 organized a transportation coach tries a coach and six'through, in one way or ther. Perhaps, however, we have no right pany and put a line of small steam freight o con plain about an abuse which is acturally and passenger boats & Shoalwater bay and o be expected when the law invites tror gives a tray's harbor. The en apprise was in advance of the business of this a statey and was, not warected to pay until jit muid dayslop business populators standing at swart the path of for itself. The effect of this comparatively rement, on the papper pies of rewarding the local business became wonderfully prosperous ensembly object to the physeneocof a policy the government which invites mer to take

period of six months the boats were paying bendsome rafits and raw they have all the can do and are a out to be displaced by larger craft. In Gray's harber, the most isolated To intestrate . For many years the people of part of this count smple the change is more apparent than on Spalwater bay which f the world a property a the electric telegraph, ner a company beld the so-catled favantor's from its botrourative nearness to Astoria had patentito the "motive powers of electricity, howthe lead in population and business. A large merchant sawmill has con established, which by its employment of men and constant deever developed, for telegraphic purposes." And ot the patent was a fraudulent thing. There net a member of that company who did mand for a pplies and was, han of itself revo-lutionized as industries of the harbor. And not know that a telegrapa with alphabetical note of strips of paper, made through the agency of electro-magnetisms, was in use in in other respects progress is very notable. Farming and dairy rander have been estabformer v at the Perv hour when Morse claimed lished along the bay am giver, and Gray's haraulty in mid-ocean. People often wondered low Morse, a poor post alt painter, so gnorant of science that he inquired what he two No locali a now offers ther opportunities for new comers, particularly for those desiring to soles of a buttery meant after he came to shore, engage in the stock at I dairy business (to invent the slegraph this northern coast coun my. To the prime at-tractions of a cool, equal delimate, a constantly s hatever for practice or experiment. But proverdant range and comparative nearness to mar-ket is added that of cheer lands. And not least Paser Jackson, a scientist of recognised post-ton told the story; tak how he showed the important to the fact the 4 the immigrant man bolo nelmainle to the serrorised paints ; in the essily "spy out the land" of this interesting region for it meelf, at little expense of time and sould ring a bell by electricity at a distance.

The transportation beginnes of the coast is now done almo ; wholly by the local boats and by toams on the ocean beaches. In a little whil., however, when the business is larger, the bulk of it will be done by schooners renning direct from Padiland or San Fran gain the train which must become very valueble. Portland has the eleganters of vicinity and time, and with preser care can take the business and hold it; but she will not get it by a monopoly of this discayary has oppressed the simply declading that she ought to have it. We Imperiation to the ways of this instru-has been taken. The history of this instru-ment shows that neither of the so-caled in-tential of the so-caled in-further, we must afford seguiar means of supter of prices for what we sell, and again in the r nters who have nessed their claims and re-orived the immense benefit of a patent for their economes only occasions by and at irregular intervals

San Francisco enjoys a special and a great advantage ov: Portland is the matter of the costs trade, even the what, geographically, cought to be our own field. The chief industry in all the coast ports except Yaquina bay, is lumber making. The market for lumber is in San Francisco and the or sers of the milis are, we believe, without once tion, San Francisca ity is in the hands of the mall companies, whose the present, must find he business among the settlers of the country, of those who supply them, and to those she must furnish the means of transportation, independent of the luminor echooner lines. It is to the interest of the settless to favor trade wits Portland in competition to the mill compenies, where exharist

THE STRIKE A PAILURE.

The now confessed failtre of the strike of elegraphers is the result which every well informed person expected wom the beginning After the first day, when is became apparent that the strike, though it ad left the company very short hended, had not paralyzed it, the whin pope up with a veto upon the desarrance the company would win. At best armed with backs, when even nature a strike can have only temporary moneas; for the original disactly producing a hotter in any community the barse class of work will in the long run, alway receive the same right to loop or drive a hole into the ground as wages, and if sages are high in any trade they simulated of getting at the water upon their sem they will draw late that trade an angenal land, they make an objection which possibly number of wateries, as a competition will. soon bring da in the wages to normal figures.
On the other land, laborers will desert a trade parent laws amount be thrown saide. Where they are poorly pail and this loss will the only means of getting rid of "careers" force the employer to ngon hit age of great use to civilization. The wages. No combination on one side or the other can overcome his superal law. But group granting the investor and gives the strikurs uning really ignore it, and hence it is intention to the people. But this course should that they attempt to carry their point by a purshed with actual inventions only, not method which hever can a good.

That many of the operators are now willing men ideas or of things long in use in one form to come backlij an add issen on their part that rancther.

they have not been so poo y paid as they have asserted. Were it so they would not return to this occupation, but word engage in some other. They who do not eggaze in some other, but return to this, adm thereby that the Fig. wages paid to operators ; e not low as compared with those paid in other employments. Probably the opmpany wis see as well is other employers the impolity of paying their empluyor so pourly that they will gradually leave their service. The failure of this strike ought to be an important lessor in the relations of, employers and employed In particular, it dught to duty nee worth; men that the worst possible policy for themse wes is to place their interrests in the bands of a semmittee and subthe best judge of what is not for himself and should not not all himself to be " ordered out" by anybody, or " ordered o" either,

From January 1 to August 1 the United States mints roduced, besides the subsidiary coins, 13.9525500 in sold and 16.725.619 in 113,000,000 silver dollars, a zainst 90,000,000 of which it has smed silve certificates. Not only, then, dee the given means steadily add "The starming description in the Angust only, then, dee the give numer cont." is the subject of at article in the Angust silver to our cureboy, but in manages, slep, to an nier of Forcesty (an English publication).

From the you let Mr. Welliam Little of Monfrom the you let Mr. Welliam Little of Mondollars be owned by the people rather than by American forestry his study. Mr. Little that a power men. The government owns less than 25,000,00° in legal moder silver dollars, having manage in various ways, especially by the control of outling, the United Systes will be an the aliver certif rates, to it unfer the ownership, birdly drauded of its merghantable pins and of everyained silver so the people at large.

The eliver certificates are tops at par, partly The work of clearing away the sand har at because the go irument excepts them, partly St. Helena, by the plan anish proved excepts. Distance the mallonal lighter can enumerate them as a part f their legal reserve. Accordingly, militar as milyerous floates have permapeople imagine. It is an error, therefore, to may that we have a good currency, and that the currency remains seable and menad.

It is evident from several samples of Wil-lamette valley wheat received in this city during the past week that fa mers are threshing exhibited is soft to a degree which will seriqualy aurt its value. Too sardy threshing can furners when they come to marshouse or sell their grain. This is a very monthapt matter, and we feel it a daty to supress the danger upon the country. Time should be taken to allow the wheat to cure as the stalk before

Celifornia namers, too, are protesting is that state as well as this. Too much wheat are wing is the complaint. In California there but at It it is not varied shough. The Call, show energies of the stabilished settlements probating against the prevalent habit of de-became active at once and new people poured voting so much attention to grating growing, in by scores and has dreats. The few lines of cays "If allords uptiling for other plasses of workers to do. Read prosperity must be based Cu a vertical industry."

France is contracting a new los 000,000. She down hearly \$5,000,000,000, and it is becoming rather a serious question as to whether the amount has not become too large ture including that of the manner standing army and the paying standing true from the manner standing army and the paying standing to the manner that the paying standing to the paying standing the sta times that of the United States :

This work will about cless the nation season. The achoos open very shortly, and there will be a larrying home on the part o'matters with their flocks. Ly all means the school variation should be extended in bor products are coming to be known in the the future. The warm September days de benealts of the July and August recreation.

The Ohio State Journal says that the henofits of the last which taxes the liquor traffic in setive opposition to the law has about died out. But the saloon element does not relax its purpose to get a legislatore which will repeal it next milter, and the friend: of the law are therefore arged to be on their guard.

The Navajo indiars will have a wool clip this year of 800,000 pounds. The hides and pelts that they will hand a will amount to his year of 800,000 pounds will advount to get to the will advount to about 600,000 pounds. And the settles the "Ind an problem" so far as the Résajo's are cancerned.

HOUSE AND FARM.

Physicians say that g n per a le is a poor sulstitute for vater, because the capsi-cura it contains irritates the living of the stomach and produces dangerous in-

flaramation. According to the Chemisher Zeitung M. Muller has evaporated thirtmed milk in a vacuum, which can, he thinks, be preserved for many nomine in any olimpte or atmosphere. nate or atmosphere.

The Vienna academy of Sciences of-fors two prizes of 1900 floring each for the best treaties on the canacity of crys-tals to condense electricity, the sequent, to determine the constitution of albu-minous matter of bodies.

A curious fact has been observed by Professors Ayrion and Perry. Softiiron whon nested between a red and white heat seaments between a heat ceases to be attracted by a magnet. When soft iron is bent between red and winte bot iron it ceases to be attracted by a magnet.

The Astronomer Roya for Scotland lately read a paper from Profesor Crum Brown on bright Mends on a dark night say. He, Professor Emyth, said be

night say. He, Professor Smyth, said he had witnessed this strangs phonomenous on April 16, 1882, and April 30, 283. The air was for a few hours dry from a cause notwery clear.

Among the most important of the scient file results of Coloned Preferedustry's late journey's in Thibstiwers the animal and vagetable collection, domprising 498 specimens of 90 species of mamalia, 4,25 of 400 species of to da, shout 960, of 50 species of periles, 23 pt 53 species of tish, 600 of insoots, and 120,000 of 15,000 species of plants.

The best sugar business in Delaware Mahore claims the credit for having increased the marker of free schools in Virginia from 2 000 to 6,000. Gail Eam iter Miss Abigail Dodge) is described as a plain, brown eyed lady of the miss unp etending type.

So long as been ball reports continue. to come egulary nobody will believe that the telegraph company is embar-

of 15,000 species of plants.

The best sugar business in Delaware is a disastrous sailure, and the company with \$120,000 capital, organized to carry it on, has goos the way of all earthy things. The managers say that the trouble was in the bests—that they did not have sugar enough in them; but some think that the misshie was done by increasing and but recovery. rassed.

Rober L. R-am, father of Vinne Ream Exite, the sculptor, has been appointed special agent of the general land off se. Ind off so.

The difference of forty years between the ages of a Mibligan bride and bride-groom was again at the woman, who was seventy two.

The Portland Advertiser thinks Dor-Pretty mate for ornaments on a marble sey declined the offer of the Interior portfolic because the Star-roule port-folic paid better mante are made of sorim or of linen mombe cloth. They aloud be long and harrow, and be trimmed with noe across the bottom, and have come pretty design in Kensington embroidery on them. The more effective and striking the design, the better form it is in. Stand a wase or jar on the unorsamented end, and let the other hang over the mantel. olio pei l'hetter Mrs. Elisabeta Stuart Phelpa is living almost the life of a recluse at West Chouces or, Mass., and working diligent-ly at a new story. that if pointed shoes remain in use hu-man to: will escutually be obliterated

Verierable L nren.

apeial facilities are as commanded as the first processes of the claim, which is regresses to the claim, which is represented to the commanded principles of the commanded of the com London is a owly awakening to see that it is not only the b great and nolfest city in the world, but in many ways the grandest and most historic. Rome has her ruins; Paris haw her boulevards, palaces and quays; Woscow has her Kremlin; and Constantin pale has her marets and domes. Eac 1 of these; and and the imagisation of eight contries have shed over them, London remains to the thoughtful spirit that ust venerable uity of the modern world.—London Times.

A Coke-Barning Lecometire.

Several experienced western mechan-ical engineers visited this fit; last week to inspect the new loco not ye of the Philadelphia and Reading milroad. One Printage pine and Resolve Titled, One of these engines was prominently brought into notice by its performance on the Chicago, Burlingto, and Quincy railroad during the Chicago exposition, and afterward on the Belltimore and Ohio mittend. Past only in the state of the latest and the chicago exposition. the capability of the locomotive to us once for the parties of the companies of the penalties for the western occupanies from the penalties for the companies from the penalties for the companies from the penalties for the smoke nuisance, but will seeme present one fort and olessure to the traveling pubnuisance, but will secure recision comfort and pleasure to the investing pubtic. The tests of the losomotive demonstrated that continuous runs of two
hundred miles can be mis a with coke
lucel, without any further attention on
the part of the ireman tha meraly feeding the furnuce, and that secawhile no
clinker or other obstruction to the draft
occurred during the trial, which were
of a most exacting nature. The coke
used was the product of the Condelive in the part and the part of the ireman as the product of the Condelive in the color of the color o

A number of mining on panies in Arizona territory are about to adopt the electric light to facilità o operations underground, as well as o the surface, notably the Silver King mining company, the Howell smelt ug and mining company and the Conger mill and mining company and the military ground and two below. As the Miller the ground the mining the military milled to the current deconding to the indights and storage boxes, from which later the Swan lamps are to be cannoted by small copper wires. Fixed lamps are to be suspended from the roof of gallerina and the portable lights are to be attached to fexible conductors for convenience of children. These lights are to be not continuously, night and day in the reduction works of this company. Such large and small lights are as a to be head, a separate dynamo and two starses betteries applying the officer. The are light viscosit is the Silver King mine will be about half a mile it length.
